

3/16" Saw-Cut Layout Kit

Performed Saw-Cut Loop Installation kit

The Saw-Cut Loop Layout Kit is designed to work with **BD Loops** 3/16" preformed inductance loops.

The **BD Loops Saw-Cut Layout Kit** uses modified measuring tapes to allow installers to quickly layout the loop pattern. The Layout Kit helps prevent the loop pattern from being cut too large for the loop to fit in. Sight sticks allow experienced installers to cut the pattern without chalking lines. If you don't do your own cutting the kit can also be used to layout and mark cutting patterns for concrete crews to follow. The Kit includes other time saving tools such as the Groove Cleaning Air Wand, Pizza Wheel & Wedge Tool, Clean Out Tool, and modified chalk string.

BD Loops Saw-Cut Layout Kit includes:

- Measuring Block with Tape Measures
- Dog Ear Corner Template Block
- Construction Crayon
- Modified Chalk Line with T-Bar
- Sight Sticks – For cutting without marking lines
- Groove Cleaning Air Wand
- Pizza Wheel and Wedge Tool
- Clean out Hook
- Upside down clear acrylic spray
- 1/8" Masonry Bit
- Carrying Bag

3/16 inch saw-cut pizza wheel and wedge tool

Preformed saw-cut installation tool

Saw-cut wheel is made to work with **BD Loops** 3/16" preformed detection loops.

Quickly and easily push the loop to the bottom of the groove while standing using the BD Loops Pizza Wheel and Wedge Tool. This handy tool is made of smooth and durable PVC that will not nick the loop wire. The wedge tool allows installers to easily push wire down into 135° dog eared corner cuts. The roller is 1/8" thick and works best with BD Loops Preformed Saw-Cut Loops.

BD Loops Pizza Wheel Features:

- 1/8" wide wheel and 135° wedge tool
- Wheel is made of durable PVC that will not nick or damage loop jacket.
- Designed for saw-cut depths up to 2 ¼" (1 ¼" — 1 ½" is BD Loops recommended saw-cut depth—see back side of this sheet)
- Can be used to help clean out saw-cut grooves.
- Easily push BD Loops Preformed Saw-Cut Loops to the bottom of the groove while standing.
- Wedge tool easily pushes loop to the bottom of the dog-eared corners.
- 3/4" PVC Coupler to accept any length Schedule 80 PVC handle.

Pizza wheel may be stiff at first but with use will loosen up.

Groove Cleaning Air Wand

Clean and dry saw-cut grooves from the bottom, up!

- Quickly clean and dry a saw-cut groove from the bottom up. Tip will fit into a 3/16" groove.
- Properly prepare saw-cut grooves for loop sealant according to the sealant manufacturer's standards.
