Brian Dickson,

Thanks for the opportunity to try out your new 3/16" prototype sealent tips on our last loop job. Using the new sealent tips allowed us for the first time to seal the BD Loops Saw-Cut loop with one pass. Normally we would have to make 2-3 passes to completely seal a loop. The specially angled tips easily fit into the 3/16 saw cut groove, allowing the sealent to fill the groove from the bottom up not the top down. The new tips fit both our Chemque and Bondo sealent tubes. I think the depth gauge is useful and convenient also. I can't wait to see the final product!

The new sealent tip with BD Loops TB-Kit saved us over 30 minutes of installation time per loop. This was the fastest and easiest time I've ever had sealing a loop. I appreciate your commitment to the industry and want to thank you for all your excellent products.

Sincerely,
Tom Genda
